Before you dig, call 811

Know what's below.
Call before you dig.

Planting a tree? Installing a fence? Planning a home improvement? Call 811.

Did you know it's the law to make this call? Electric power lines, natural gas pipelines, water pipes, communications lines, and other utility services can be within a few feet of the ground's surface. Not knowing where they are can result in personal injury, property damage, and neighborhood service interruptions. Even a small dent or a scrape can cause damage, resulting in a leak or service-wide disruptions.

If you're planning any type of excavation, call 811 at least three full working days before digging, drilling, or blasting. This national service, which is performed at no cost to you, helps keep you and your loved ones safe.

For more information about the national 811 program, visit their website at www.call811.com

Red	Electric	Purple	Reclaimed Water
Yellow	Gas, Oil, Steam	Green	Sewer/Drainage
Orange	Communications	Pink	Survey Marks
