Be the boss of your bills

Look for leaks – Leaks are sneaky and can waste a lot of water over a short period of time, adding up to wasted money. Check faucets, toilets and showerheads to see if there is opportunity for you to save.

Invest in smart tools – Smart thermostats, smart appliances and smart irrigation controllers all use technology to help you save.

Look for labels – When buying appliances, water heaters, electronics, light bulbs, toilets, faucet, shower heads, and more, look for ENERGY STAR® and WaterSense labels. Items with these labels are certified by the EPA to use less and can save you significant money on your utility bills.
